Attachments: Provisional JR Chl rulemaking timeline_APR2018.xlsx

Cheryl...our current James R. CHL'a' criteria timeline estimates going to the Board at the December meeting to ask them to publish a Notice of Public Comment with final adoption Fall of 2019 (see attached). RE: Ches Bay addendum update: That is on the agenda to go before the Board at their April 12th meeting. We are doing a Fast Track rulemaking as it's non-controversial which means EPA should receive an approval package for that in August.

Thanks! Sorry more questions. What if anything is your timeframe for the James Cl a work and possibly adopting the WQS pieces of latest CB addendum.

Cheryl...no more RAP meetings have been scheduled. Earliest conceivable time to appear before the Board for final adoption would be at the summer quarterly meeting in June of this year. Due to recent legislation passed by the VA General Assembly the ammonia criteria will be separated from the other issues (bacteria, cadmium, human health). The soonest ammonia could go back before the Board for final adoption would be December. Here's a link to a legislative summary for VA Senate bill 344 that blocks adoption by the Board until certain stipulations are met. --> <http://lis.virginia.gov/cgi-bin/legp604.exe?181+oth+SB344FER122+PDF>

David can you give me status of the carry over and any schedule of millstones. And if there are any RAP meetings planned? Anything we can do to help this along?
